GELATEC

The most harmonic concentration of technology, design and ergonomics give life to Gelatec new masterpiece. GELIDA has been designed to magnetize the glances and, at the same time, to complete and harmonically fit every kind of already existing environment both modern and classic.

# TECH

## Gelatec presents the first line of 4 side glasses vertical displays

- MICOCLIMATE** GELIDA creating different microclimate ensures the optimal condition for any kind of product.
- GLASS** Pure visibility is a strong point for GELIDA. The ultra extra clear glasses combined with the True Color LED lighting system enhance the natural attractivity of the exposed products.
- COOLING** This is the essence of this product, we gave there all our strength. A+++ compressors with low energy consumption with continuous evaporation to reach the perfect temperature with the right quantity of air. With the best worldwide components GELIDA can guarantee perfect and long term functioning.

# TECH

## SILENT

With anti-vibration systems and sound-absorbing components, we can barely understand that GELIDA is working.

## SHINING

Magnifying the beauty of products. GELIDA CRI led lighting gives to the user the possibility to regulate not only the intensity of lighting but also the Kelvin tone level from warm to cold.

## SMART SELF MAINTENANCE

Maintenance is the most important way to prevents malfunctioning of equipment .It requires time and regular intervention. Gelatec, always close to the needs of operators, developed for GELIDA the innovative smart self maintainance system take care of its self instead of you.

## EFFICIENCY

The world's shortest required time period to reach the set point temperature after every door opening by the operator.
